

ECO 12

LTH

PORTABLE TOILET HIRE

Comprising of a 6-8 person canteen, drying/ generator room, and private W/C, the Eco-Welfare is a robust and secure mobile welfare unit suitable for even the most demanding of environments.

Additional security features include a hydraulic isolation to floor, anti-vandal windows and 6-point dead-locking system.

The completely self-contained unit is designed to become static once towed to site and is ready for use in a matter of minutes.

No on-site amenities like mains power or water are required. The onboard silent diesel generator and water tanks allow set-up in even the most remote locations. Alternatively, the units can be run from mains power should the site allow.

Canteen

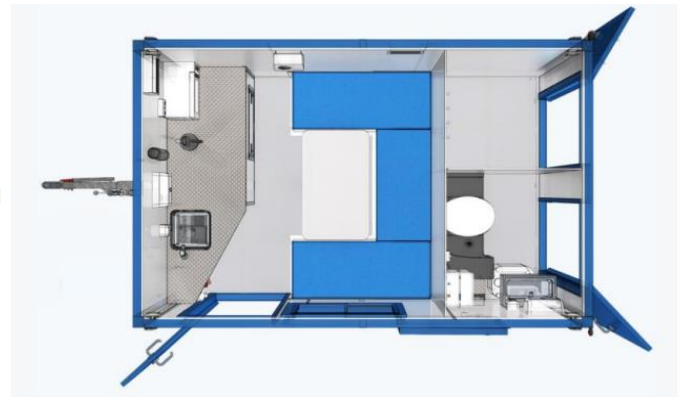

- Table & bench seating
- Sensor Taps
